### Description

After Effects users oftentimes are intimidated by "Iron Man" style futuristic HUD-like animations, but I'm here for you to say it's not something to be afraid of! Motion graphics effects are an easy task for anyone without much After Effects experience!

In this class, we will explore and learn about:

- Making boring shape layers something visually appealing
- Animations from a virtual camera
- After Effects expressions to save your time animating.

This is a basic course, and I'll explain everything step-by-step. But, you might need at least some After Effects knowledge to understand the basic functions and the layout of the program.

### The LOCATION of this course:

It doesn't take an After Effects genius to be in a position to create stunning motion graphics.

The majority of this course is focused on the creation and manipulation of shape layers in order to create attractive motion graphics. Then, we go into more detail by making use of these animations to develop professional motion graphics.

I try to break down each process and explain why I'm accomplishing what I'm. If you need help, please hit me via the section for Q&A!

### What we'll cover in this class:

- Forming basic shape layers
- The ability to adjust the properties of strokes and shape layers
- Making use of 2D Animation in a 3D space
- Enhancing footage using highlights, glows, reflections, tints, and more to create beautiful motion graphics.
- Utilizing After Effects expressions to automate simple animations.

Are you looking to become an improved motion graphics artist? Join us for this course to discover more about motion

graphics beyond just making HUD graphics.

Who is this course intended for:

- Anyone looking to master After Effects form layers in order to make Hollywood-quality effects.
- If you've ever utilized After Effects but have never utilized "Shape Layers" to their fullest capacity to create AWESOME Graphic elements.
- Motion graphic creators and graphic artists

What is Futuristic Hud Motion Graphics In After Effects?

The course appears to be designed for individuals with varying levels of After Effects experience, ranging from beginners to those who may have used the software but haven't fully explored the capabilities of shape layers. Participants can expect to learn how to make boring shape layers visually appealing, work with a virtual camera for animations, and use After Effects expressions for automation.
