You can save time and keep your sanity by using This facial animation device designed for After Effects. Simple controls and auto-lip-sync make it easier to get rid of the monotony from facial motion.

After Effects 2020 and Catalina compatible

Simple to set up and simple for use. Talking Head takes the stress out of creating facial animations using After Effects. It's no longer a hassle to search through stacks of keyframes and layers to adjust the animation. Get rid of the anxiety of last-minute VO adjustments. Be on time to finish the job with enough mental strength to relish your accomplishment!

Layers can be assigned to facial features by using a user-friendly interface. Control the eyebrows, eyes blinking, the direction of your eyes lip-sync, and more with one control layer. With Talking Head one drawing can be made to come to life.
