All About Mock-Ups: source, use, create, organize (an Adobe Photoshop® and Airtable class) by SkillShare: It's time to start your design! I'd like you to experiment with one (or the majority) or more of the Photoshop techniques taught in this course and then upload a photo of your most loved mock-up with the design you created used. You can also concentrate on organizing mock-ups into a filterable gallery and snap a photo to upload as your work. You can do both of these if you'd like!

How to design patterns using techniques?

You can learn how to design templates with the Tutorial "All About Mock-Ups: source, use, create, organize (an Adobe Photoshop® and Airtable class) by SkillShare".

Where can I download the product?

After subscription, You can download it for free from here.

- 9. Smart Objects
- 10. Adding Perspective
- 11. Following Curves
- 12. Complex Surfaces
- 13. Airtable Gallery
- 14. Your Project
- 15. Thank you

To take screenshots:

- On a Mac, make use of Cmd-Shift-4, then drag the screen, which will save it to your Desktop.
- On a computer, a PrintScn button on the keyboard typically allows an entire screen capture into the clipboard.
- Use Photoshop to save your files to display the size you want on the screen.

If you're not familiar with posting your work on Skillshare, Here's a brief tutorial on image sizes:

- Cover images will be cropped and become landscape format. Pick a resolution roughly 3:2 in proportion, like 1500px wide by 1000px high.
- Images included in the project may be any size with a file size of less than 2Mb.
- Posting projects is a great chance to have your work noticed and get comments. Therefore I suggest you upload something you've created through this course. I look at the work you have created.

Please note that I have also added useful resources to you on this site too, such as:

- Adobe Photoshop Link to a no-cost trial as well as keyboard shortcuts
- Mock-Up Sources List
- Transcripts of the class
