

### Kellerman Software Search Databases v3.0 (06 Nov 2021) Retail + License Key

2024-12-18 23:03:00    [label](#)    [我要反馈](#)    [下载页面](#)

A database searcher is considered to be like the Google for the user SQL Server database. It has the ability to search all the columns as well as the tables over a database which is multiple in nature as well as the capability to generate the SQL along with a detailed match per table for the user and a developer. It also has the capability to search j the schema by the table names or even the column names respectively. The knowledge of the query of the SQL is not required in this case by the user. It has the ability to be purchased separately by the user and the product is being included in the gold suite. The subscribers as well as the members of the gold suite are capable of that are present for free as an annual subscription.

### Kellerman Software Search SQL Server Database Great Features:
