

Progress Telerik UI for ASP.NET MVC 2024 Q4 v2024.4.1112 (12 Nov 2024) Retail Version

2025-05-23 12:50:56

With over 110 robust, versatile UI components, is the easiest way for developers to build modern, high-quality web apps. These components span every part of web development, from managing data to designing interactive user experiences. Telerik offers grids, charts, scheduling tools, and document processing capabilities on hand and integrated seamlessly, out of the box, and at top performance, with full compliance with accessibility standards.

Telerik makes things easy with pre-designed themes like Fluent and Material and tools like Progress ThemeBuilder and Figma kits to create a visually appealing and uniform user interface. The customizable API makes it easy to implement, thus making it possible for you to add tailored features to fulfil your users' exact requirements. Your apps built on top of these enhancements are built by default to work across devices and data-intensive scenarios.

Telerik UI for ASP.NET MVC Encompasses powerful data visualization elements, interactive UX elements, responsive navigation and layout components and more – everything needed to develop expressive and engaged web experiences. This library allows you to save time and build faster, whether creating dashboards, scheduling systems or interactive forms, without sacrificing quality.

Key Features of Telerik UI for ASP.NET MVC :

- Extensive UI Components Library:** Over 110 versatile UI components for creating data-driven, interactive, and visually appealing web applications.
- High-Performance Grid:** A powerful grid control with features like sorting, filtering, and lazy loading to handle large datasets effortlessly.
- Professional Design Tools:** Pre-designed themes, ThemeBuilder, and Figma kits enable you to create professional and consistent app designs.
- Customizable API:** A unified API across components makes integration and customization straightforward for developers.
