DevExtreme offers a comprehensive suite of UI components tailored to various application needs, from blazing-fast DataGrids and responsive Forms for CRM & ERP applications to sophisticated data visualization components for analytics & BI dashboards. With features such as Scheduler and Gantt components for project planning and HR management tools, including data grids and organization charts, DevExtreme provides the versatility and performance necessary for diverse development projects. Its responsive layout templates enable developers to create stunning user experiences effortlessly.

Whether developers are building multi-purpose admin dashboards combining data management and business intelligence views or crafting modern SaaS applications with responsive navigation and authentication forms, **DevExtreme** offers pre-built layouts and templates to expedite development. By providing a robust toolkit for building web applications with exceptional user experiences, DevExtreme enables developers to deliver powerful and responsive applications easily, ultimately enhancing productivity and accelerating time to market.

Key Features of DevExtreme:

1. DevExtreme includes 4 product suites with 70+ UI components and integrated development templates/dev tools.
2. Built-in adaptivity support simplifies cross-platform front-end development.
3. UI components cater to desktop, tablet, and phone platforms.
4. Components include DataGrid, Form, Data Editor, Scheduler, Kanban, Gantt, Data Grid, Tree List, Diagram, and more.
5. Supports development of CRM & ERP applications, analytics & BI dashboards, project & task management tools,
6. HR management systems, admin dashboards, and SaaS applications.
7. Offers high-performance data visualization components with real-time update support.
8. Provides pre-built layouts and templates for admin dashboards and SaaS applications.
9. Facilitates responsive navigation and authentication forms.
10. Empowers developers to create stunning user experiences effortlessly.
11. Boosts productivity and accelerates time to market for web applications.
