Procreate Dreams Essentials: Create, Animate, Share: Welcome to "Procreate Dreams Essentials for Beginners: Create, Animate, Share!" This course is your accessible entry point into the dynamic realm of animation using Procreate Dreams. Whether you're a digital art newcomer, a hobbyist, or a graphic designer, this comprehensive guide will lead you through the enjoyable and creative animation process.

Beyond just a series of tutorials, this course offers a streamlined approach to achieving quick and satisfying results in animation with Procreate Dreams. Covering both fundamental and advanced techniques, the curriculum is designed to deliver immediate fun and gratification in animation creation, laying the foundation for your ongoing digital art journey.

Class Objective:

The primary objective is to acquaint you with the basics of Procreate Dreams, guiding you to craft a simple yet captivating animation. You'll be prepared to share your creation on social media and impress your friends and followers upon completion. Who knows? This could be the beginning of a new career path for you!

Target Audience:

This course caters to beginners in animation, digital artists, hobbyists, graphic designers, and even those with some prior Procreate experience (although absolute beginners can also enjoy and learn from this class). You've landed right if you're curious about animating in Procreate Dreams!

Course Structure:

The course is organized into ten user-friendly videos:

- Introduction
- Making a New File
- Flipbook Frame-by-Frame Animation
- Working with Keyframes
- Drawing Simple Eyes
- The "Perform" Animation Feature
- Adding Audio and Other Media
- Project Reminder
- Exporting Your Movie
- Next Steps

Key Features and Tools:

Explore Procreate Dreams' intuitive interface, delving into the Stage, Backstage, and Timeline. Learn about keyframes, the "perform" feature, and the tools in Draw and Paint mode. The course covers adding and manipulating audio, text, video, illustrations, and images in your animations. Additionally, discover how to export your projects in various formats for sharing within the class and on social media.
