

## DMSoft DBSync for Access and PostgreSQL v4.2.6 + License Key

2025-01-06 23:22:12    label 我要反馈    下载页面

Introducing , a flexible software solution designed to streamline the conversion and synchronization process between Microsoft Access and PostgreSQL databases. With seamless compatibility across a range of platforms, including on-premises PostgreSQL, AWS RDS/Aurora, CockroachDB, Google Cloud SQL for PostgreSQL, Azure Database for PostgreSQL, and Heroku Postgres, this tool empowers users to migrate data effortlessly in any combination.

One of the standout features of **DMSoft DBSync for Access and PostgreSQL** is its ability to convert MS Access automatically queries into PostgreSQL views, eliminating the need for extensive SQL dialect knowledge. Additionally, users can tailor their migration preferences, whether it involves transferring entire databases or selectively choosing schemas, tables, queries, fields, indexes, and foreign keys during setup. The software offers flexibility in data storage, allowing users to save result data as PostgreSQL dump files or PHP scripts, bypassing restrictions for direct access to the PostgreSQL server.

**DMSoft DBSync for Access and PostgreSQL** is not just about data migration; it's about synchronization. This robust two-way synchronization software ensures that changes made in either Access or PostgreSQL databases are promptly reflected in the other, maintaining data consistency and integrity across platforms. As a result, users benefit from enhanced collaboration through multi-user access to the database, scalable data handling capabilities, and comprehensive backup management.

## Key Features of DMSoft DBSync for Access and PostgreSQL:

- Automatic conversion of MS Access queries to PostgreSQL views
- Selective migration options for tailored data transfer
- Two-way synchronization for real-time data consistency
- Support for various platforms, including on-premise and cloud-based PostgreSQL databases
- Flexible data storage options with PostgreSQL dump files or PHP scripts
