PlusMemo v7.2 for D10.4 Sydney

2026-09-28 22:48:07

The trendiest memo edit which is enhanced as well as the controller for the native part of the VCL is considered to be a regular as well as a data variant which is available to the users and developers along with the main features such as the following:

PlusMemo Great Features:

- It has an automated syntax highlighting process where the keywords, opinion, as well as the habit synthetic algorithms are available. The user does not know how to believe that it is very easy to automatically as well as proactively format that own keywords.
- There is a rich collection of the attachment part which is free for the user and even the gutter, the numbers in the line, printer part which has the ability to use the capability of the preview option, the live spell checking option that has the capability to work along with the addicted spell check, the highlighter of the URL, and last but not least a highlighter of HTML and a few more to be mentioned.
- Mixing any style of the font, or even the background, the foreground as well as the colors for the elements of the text which belongs to the user, and also at the same time using the two distinct fonts to the user liking.
- There is no limitation on the duration of the text and even the older window variances are same and has the capability to operate on the Windows 98 and above.
- It has the capability to manage the100 MB readily on the system which is minimum.
- To be concluded there is a multi-purpose undo as well as redo option process for the user and developer along with the process of dragging and dropping the editing, justification of the text, choices in the column block, various attributes, as well as different way in order to interact in the process of run time along with the text material.
