Intro to Graphic Design: Poster Design #007: The class consists of short lessons covering every Poster stage. The course will focus on selecting which typeface to use and how to design aesthetic poster visuals.

What can you expect to learn?

The entire class is within Adobe Illustrator, which makes it an excellent chance to learn some Adobe Illustrator Skills.

Essential technical skills required in this Class:

- Primary 3D effects available in Adobe Illustrator
- Basic Design Theory
- Create dynamic compositions by using type
- How can you personalize the typography
- Isometric Typography
- Post-Production
- By using Blending modes and gradients to create colors effects
- Using Clipping Masks as a design Tool

This class is suitable for any level of ability;

I've taken care that it is as precise as possible so that anyone can learn the material quickly.
