Fortra Automate Desktop Premium 2025 v25.1.1.20

2026-04-08 11:11:27

offers a comprehensive solution for streamlining tasks and boosting productivity through robotic process automation (RPA). This user-friendly software transforms business and IT processes with its no-code automation capabilities, enabling quick bot development with over 600 automation actions. Its scalability makes it suitable for organizations of any size, from individual departments to enterprise-wide initiatives, all backed by transparent and straightforward pricing models.

This innovative software stands out for its versatility across various industries and departments. Whether in IT, banking, healthcare, accounts payable, human resources, or user provisioning, **Fortra Automate Desktop Premium** optimizes resources, reduces errors, and saves valuable time. Handling repetitive tasks efficiently facilitates true digital transformation and enhances overall efficiency, ensuring organizations stay competitive in today's dynamic landscape.

Fortra Automate Desktop Premium empowers users with four key automation superpowers. Its API integration kit makes connecting to essential applications effortless, while the best-in-class step recorder simplifies automation creation. The software offers over 70 out-of-the-box native actions and intelligent document processing capabilities, ensuring seamless data extraction and analysis. With **Fortra Automate Desktop Premium**, organizations can achieve automation success easily and efficiently, driving growth and innovation.

Key Features of **Fortra Automate Desktop Premium**:

1. **No-Code Automation:** Quickly build bots with form-based development and access to over 600 automation actions.
2. **Step Recorder:** Accelerate automation creation and distribution with ease, simplifying the process for users.
3. API Integration Kit: Simplify connectivity to essential applications, enabling robust automation without technical expertise.
4. **UI Automation:** Utilize the best-in-class step recorder to efficiently create automation mirroring user interactions on web browsers and desktop applications.
5. **Native Actions:** Benefit from over 70 out-of-the-box native actions and 700 sub-actions for common applications, enhancing automation capabilities.
6. **Intelligent Document Processing:** Enhance automation with intelligent document processing, seamlessly extracting and analyzing unstructured data.
