Unreal Engine - AR Navigation:

AR Navigation empowers app development utilizing augmented reality for seamless navigation within a specified target area.

- Automatic calculation of optimal routes using two algorithmic approaches.
- Dynamic 3D minimap displaying the user's current location and rotation.
- Intuitive user interface indicating the destination, remaining distance, and a list of quick buttons for predefined destinations.
- Floating icons highlighting points of interest.
- Custom markers with the ability to snap to detected surfaces.
- QRCode detection.

Technical Details:

- Number of Classes: 13
- Input: Touchscreen only

Supported Development Platforms:

- Windows
- Mac (Intel)

Supported Target Platforms:

- iOS
- Android
