

YuPdf v2.10.0 (18 Sep 2025) for Delphi 11-13 Alexandria

2025-11-10 10:26:01

YuPdf generates PDF documents quickly, directly from inside Delphi applications. No external dependencies.

YuPdf comprises the following operation:

- Create PDF files containing text, images, and bitmap images.
- Easily include outlines, annotations, and document attachments.
- Embed JPEG and PNG graphics, maintaining transparency.
- Embed Type 1 and TrueType fonts.
- Document and image compression and encryption.
- Character set and encoding service (1- plus 2-byte UTF-8, ISO 8859-1 into 8859-16, Windows 1250 into 1258, KOI8-R).
- CJK fonts and encodings for Japanese and Chinese text.
- Item wrapper classes for basic coding.
- A wide number of demonstration projects to begin.
- No dependencies do not call for DLLs or outside documents.
