IronBarCode is a comprehensive C# Barcode Library designed for seamless barcode generation and reading within .NET applications. With its user-friendly API, developers can effortlessly integrate barcode functionality into their projects, whether they need to generate or read barcodes. Supporting a wide range of barcode formats, including QR codes, 2D matrix codes, and various linear barcodes, **IronBarCode** ensures accuracy, ease of use, and speed.

Compatible with popular .NET languages such as C#, VB.NET, and F#, **IronBarCode** offers cross-platform support, allowing developers to run their applications on different .NET platforms like Core, Standard, and Framework. It supports various operating systems, including Microsoft Windows, macOS, and Linux, as well as deployment environments like Docker, Azure, and AWS.

IronBarCode provides robust features for barcode reading and writing. It supports reading from multiple image formats, streams, and PDFs, with options for image correction filters and multithreading support. Developers can customize output data formats, set accuracy and performance levels, and apply styling options such as resizing, recoloring, and adding annotations or logos. With detailed error handling, fault tolerance, and format awareness, offers a reliable solution for barcode processing in .NET applications.

Key Features of **IronBarCode**:

1. Generate and read barcodes in C# & VB .NET applications
2. Support for .NET 8, 7, 6, 5, Core, Standard, Framework
3. Cross-platform support for C#, F#, & VB.NET running on .NET
4. Compatibility with various .NET versions and project types
5. Supports multiple barcode formats, including QR codes, 2D matrix codes, Aztec, Data Matrix, and various linear barcodes
6. Reading capabilities for images, multipage images, IronDrawing, and System.Drawing objects, streams, and PDFs
