Screen Recorder by Omi v1.3.25 for macOS

2026-03-04 13:42:59

offers a robust solution for effortlessly capturing your computer screen in high-quality video formats. With a simple click, you can record the entire screen, a specific area, or footage from your camera, all conveniently saved in MP4 format for easy sharing. Key features include full-screen, area, camera, window, app recording options, voice recording, and camera picture-in-picture capabilities. Advanced features such as camera virtual background, system sound recording (with additional plugin download), mouse click event recording, and keypress event recording enhance your recording experience. Additionally, the tool offers customization options for screen size, frame rate, resolution, recording duration, shortcut keys, and a built-in video editor for further editing flexibility.
