One Lightroom preset that can be used to start any workflow. It was created by a professional photographer.

This preset was created by a documentary photographer who is a full-time professional. It serves as my base for every edit. This preset is designed to warm skin tones, add color and contrast, while not looking too edited. This preset provides a solid, realistic editing foundation that you can build upon to create your unique style. It can be used across multiple shoots and is simple enough for you to add some flair to your photos, while still maintaining a realistic image.

These presets can be used in Lightroom. These presets can also be used for Camera Raw and Photoshop in the Actually Allison shop.

Install the file by unzipping it.
