Course Highlights:

- Professional architectural sketching using Morpholio Trace.
- Learn from Amin Zakaria, an experienced project architect who observes and transforms buildings into captivating sketches.
- Dive into the fundamentals of architectural sketching and explore the Morpholio Trace app features.
- Create quick perspective drawings and delve into color rendering techniques.
- Develop a complete set of concept drawings for a single-story residential house project.

Course Project: In the hands-on project, design a single-story residential house to apply the techniques learned throughout the course. Under Amin's guidance, develop a layout plan, create architectural diagrams, and bring your design to life through perspective sketches and rendering.

Who Is This Course For? Perfect for architectural students, designers, and architects with a basic understanding of architectural or perspective drawing. It is ideal for those looking to enhance their sketching skills and explore Morpholio Trace's potential in architectural sketching.

Requirements and Materials:

- Access to 3D modeling software of your choice.
- iPad with the pro version of the Morpholio Trace app.
- Basic understanding of architectural or perspective drawing (recommended).
- Familiarity with digital sketching platforms is beneficial but not mandatory.

Join Amin Zakaria on this inspiring journey, gaining valuable insights and practical knowledge. Whether you're a student seeking improvement or a professional expanding your creative toolkit, this course is tailored to your architectural sketching growth.
