Karl Taylor Photography – Chivas Regal Composite Photoshoot: Step into the world where photography meets CGI and witness the compelling results that emerge. In this immersive bottle photography course, you'll seamlessly blend real-world imagery with computer-generated backgrounds.

Karl embarks on what initially seems like a straightforward shoot, only to encounter unexpected challenges that lead to intriguing problem-solving opportunities. With a plethora of lighting equipment at his disposal – from softboxes to Fresnels to projection attachments – he meticulously crafts the perfect ambience for capturing the essence of whisky.

Throughout the session, Karl ingeniously utilizes props, reflectors, and various modifiers to masterfully illuminate every aspect of the bottle, its label, contents, and even the accompanying glass. Of particular interest is his dedication to achieving mesmerizing caustics on the wooden surface, showcasing the lengths photographers go to for perfection.

Once the images are captured, Karl seamlessly transitions into post-production, demonstrating how to merge them in Photoshop seamlessly. From removing unwanted halos to ensuring flawless integration with the CGI background, you'll learn invaluable editing techniques that elevate your photography to new heights.

To ensure seamless integration between the bottle shot and the CGI backdrop, Karl concludes the session by photographing a cube, facilitating perspective matching for a flawless final product.

In this comprehensive class, you'll gain expertise in:

- Product photography complemented by CGI backgrounds
- Advanced lighting techniques tailored for bottle and beverage photography
- Harnessing the power of scrims and reflectors to enhance product imagery
- Mastering the art of creating captivating caustics
- Unveiling essential Photoshop tools and techniques for refining bottle and beverage photography
