RunTime ToolKit Deputy v2.6.1 (23 Aug 2022) for Delphi 10.3-11 Alexandria Retail

2026-10-07 08:27:50

IDE Expert to ensure that there is no development of orphaned processes.

Deputy is licensed in two ways. It is possible to use it by the terms in the GPL v3 license for free or purchase a commercial license. The expert will monitor for debugging and compile actions within Delphi IDE. Delphi IDE and terminate any running instances of the targeted application before compiling. Be aware that this could end this process and not save any information.

RunTime ToolKit Deputy Great Features:

- The process uses image path to ensure that the process that is ended is the one that will be replaced in an IDE (this lets you have a second copy running from a different directory, for example, the build you are releasing)
- Process Identification Logic
- The plugin determines the process to end according to the order in which they occur:
- A process that's a part of an IDE instance through PID and the name of the process
