### HOW TO INSTALL

1. Open Premiere Pro
2. Go to „Window“ --> „Effects“
3. Rightclick on the folder „Presets“ --> „Import Presets...“
4. Select the .prpiset you just downloaded
5. Create a new timeline with your resolution of desire and import your already stabilized Hyperlapses
6. Drag and drop one of the presets onto your Hyperlapse clip Important: Don't speed ramp any of the clips Just simply speed them up normally if you need to (Rightclick on clip --> „Speed/Duration...“)
7. Click on your Hyperlapse clip on the timeline and go to „Window“ --> „Effect Controls“
8. You'll see that the preset added some keyframes to „Motion“ & added a „Transform“ effect
9. On some presets there are two Transform effects added always scale the lowest of the two Transform effects!

### What is Hyperlapse Motion & Transition Presets?

“Hyperlapse Motion & Transition Presets” likely refer to a set of presets or templates designed for video editing software, such as Adobe Premiere Pro or Adobe After Effects, to create hyper-lapse-style motion and seamless transitions in videos.

When using hyper-lapse motion and transition presets, it's important to ensure that they are compatible with your video editing software, as different presets are designed for different platforms. Additionally, you may need to adjust settings and customize the presets to suit your specific video project and creative vision. These presets can be valuable tools for enhancing the visual storytelling and overall quality of your videos.
