# DBi Tech Calendar Controls for Silverlight & COM

2024-12-18 23:01:31

DbiCalendar is straight ahead and to the purpose supplying appointment calendars and scheduling presentations for WPF program development. DbiCalendar unites three straight edit controllers; a Multi-Column Day/Resource View, a Month Calendar View, and a Week Calendar View, into a streamlined, feature-rich, absolutely free WPF controller.

DbiCalendarWPF offers programmers the ideal set of tools for handling:

- Appointments,
- Contacts,
- Places
- Tasks
- User/Owner Drawn Columns

With immediate inline editing, built-in context menus, and complete data integration involving multi-level groups and sorting.

DbiCalendar unites three controllers; a Multi-Column Day/Resource View, a Month Calendar View plus also a Week Calendar View, into a streamlined, feature-rich, absolutely free WPF controller. Fantastic for adding monitoring performance in almost any WPF...

DbiCalendarWPF is straight ahead and to the purpose of supplying appointment calendars and scheduling presentations for WPF program development. DbiCalendar unites three direct edit controllers; a Multi-Column Day/Resource View, a Month Calendar View, plus also a Week Schedule View, into a single streamlined, feature-rich, absolutely free WPF controller.
