These are the presets that I employ as a base for all my editing of photos. Particularly, I like 01, 05, and 08.

Presets are a good idea in case you've never bought one previously: Many people believe they're a magical wand that makes photographs look amazing. They're not. They're clothing for pictures* and, sometimes, they work or are the right color and flatter you, while at other times, they can make you look silly.

Gfx plugin details of James Popsys – JP Master Collection Presets

The product is in the **Lightroom category**, for more information about this post you can click on the home page link in the sidebar.

If you're using presets use them to start from a point to get a feel of where you'd like to make your edit.

This pack includes 15 of my favorite presets. In order to get the maximum value out of them, you should use them with RAW images (for Jpegs, you'll have to bring the sharpness lower), and typically, you'll have to adjust the slider of exposure at a minimum to make them appear nice.

To install them in Lightroom Classic, hit the "+" on the Presets tab, and then choose to download the file.

You'll need the Adobe Lightroom subscription using either Lightroom Classic CC (v7.5+) or Lightroom CC (v1.3+) to be able to use these. If using an earlier version of Lightroom, however, these will not suffice.

Are you looking for Free presets?

If you've come to this page on an offer of free music presets, I apologize. For the past two years, I made my presets available at no cost, with more than 15,000 downloads. In the end, there are many websites that mention these. I'm trying to find all of them and rectify the error, but I'm not finding them at all.
