

Website Watchman v3.1.5 for macOS

2025-03-03 10:46:38

Website Watchman is a simple-to-use web archive tool. Monitor archives, monitor, and even go back in time.

The Watchman WebsiteGreat Features:

- Check a complete website or a portion of a website or a page
- Configure multiple configurations to accommodate websites or pages
- Daily, weekly, monthly, and weekly scans
- Be aware of any modifications, the visible code, or modifications to the resources on the page.
- It is essential to be able to prove what a particular page looked like at a specific time
- Be aware of any changes to a competitor's Website or page
- It is run locally, not cloud-based. Own your data.
- A backup is maintained with all updates to images, pages styles sheets, Js
- You can view a live version of a page from the past, Not a screenshot
- Switch between different page versions to see how they compare the two versions.
- Export a historical page as an image or as a collection of all its files
- The entire site is exported and saved all the documents as they appeared on an exact date or processed to create a local browsable replica of the Website.
