### Archipelagopresets - LIGHT & LEGACY:

The Light & Legacy collection is a stellar suite of meticulously designed film emulation filters for traditional film enthusiasts and hybrid film/digital photographers. Reflecting the preferences of photographers for decades, this collection captures the rich grain of film stocks with a digitized version, pure magic. The chemistry of Light & Legacy creates vivid pastels, clean whites, and skin tones to complement and enhance imagery rather than alter it. These filters come in both desktop and mobile versions, letting photographers achieve high-end, film-like visuals anywhere while leveraging AI masking for sharpening precise adjustments.
