### INSTRUCTIONS

There are three methods for applying photo overlays. 1. - by using overlay actions (include) 2nd Utilizing Quickstart PSD course (include only in the PRO version) 3rd - the standard Drag'n'Drop method.

#### 1ST Method: OVERLAYS Action

This approach is more advanced since it lets you easily apply overlays to any directory, and even that of other vendors. When you set the parameters of this action you are able to make your hotkey to F3 (for instance) to make sure that in just one click, you will be able to name this action 1. Double-click the 'Overlay Actions .atn the file to import it into Photoshop. After installation, you can access the Actions panel in Photoshop by clicking the menu 'Window > Actions'. There are two actions: JPEG and PNG Overlays. The distinction between Overlay Action JPEG and Overlay Action PNG is that JPEG utilizes screen blend Mode. 2. Look for 'Overlays Action Select 'Overlays Action' and then press Play any action you require. 3. The Photoshop dialog box appears and asks you to choose the image. Select 'Continue', then locate the folder you extracted and then select the photo you like. The image will be immediately uploaded into the Photoshop image file, where it is displayed. 4. Reflect, rotate, or scale the overlay, if you wish. five. Click the CMD (Ctrl) and enter, and the operation will result in an image layer mask and two adjustments layers. If needed, use a black brush to the layer mask in order to cover the image, if necessary, and then within the adjustment layers, alter the Levels or color to make sure the overlay appears suitable for the image. 6. Save the image, and then show it to your customers. They will be amazed by the outcome

#### 2nd MODE The Quickstart PSD Course

This technique lets you work within a Photoshop file and then select the overlay you prefer and make layers visible. This is convenient since you can view it within the thumbnails that show layers of the image however, it's a hassle to use in certain variations in Photoshop the file might not be able to open correctly. This feature is not required and is provided as-is.

#### 3RD WAY: DRAG'N'DROP

3.1 Drag out of the folder any image you want to place within the Photoshop file. For images that have black backgrounds, use screen blend Mode. To alter the blend mode when you double-click the layer the style window of the layer will be displayed. Switch the blend mode and move on through the steps. If overlays have transparent backgrounds there is no need
