FastCube FMX Professional v2024.2.4 for Delphi 10-12 Athens Full Source

2025-04-18 14:32:43

FastCube FMX Professional is a powerful FireMonkey component set designed for desktop OLAP. It facilitates efficient data analysis, enabling users to effortlessly create summary tables, reports, and graphs. With support for various Delphi and C++Builder versions and integration into both MS Windows and Apple Mac OS X applications, it offers versatility across platforms.

Users can quickly build reports without advanced programming skills, thanks to **FastCube FMX Professional**'s user-friendly interface. It seamlessly connects to databases through standard ADO or BDE components and any component based on TDataSet, ensuring flexibility in data retrieval. Additionally, it allows for instant downloading and handling of data arrays, enhancing productivity in data analysis tasks.

includes instant data slice creation, support for basic statistical operations and special functions, filters for measured values, and dynamic control over data display. It also offers functionalities such as calculated data and filters, conditional highlighting, and export capabilities to Excel, Word, HTML, and XML formats. With its comprehensive range of features, FastCube FMX Professional streamlines the process of data analysis and visualization for developers and end-users alike.

Key Features of **FastCube FMX Professional** :

1. Facilitates desktop OLAP with FireMonkey components
2. Enables easy creation of summary tables, reports, and graphs
3. Supports Delphi and C++Builder versions, integration with MS Windows and Apple Mac OS X
4. User-friendly interface for building reports without advanced programming skills
5. Flexible database connectivity through standard ADO, BDE components, or any TDataSet-based component
6. Instant downloading and handling of data arrays for enhanced productivity
7. Includes instant data slice creation, statistical operations, special functions, and filters
8. Dynamic control over data display, including calculated data and filters
9. Conditional highlighting of cell values and control over axis sorting
10. Export capabilities to Excel, Word, HTML, and XML formats

所有软件资源 100%安全 已检测 无病毒 无篡改
