Flowbite Pro v1.1.1 (Premium pages and components built with Tailwind CSS)

2025-06-05 02:10:41

presents premium ready-made UI components, templates, and website sections that utilize Tailwind CSS as the development framework. This product contains a responsive and professionally designed set of more than 600 components which aid developers during application development for web apps, marketing websites, and e-commerce projects. All Figma design files representing components and pages are accessible for smooth collaboration between designers and developers who must maintain design consistency.

The package provides developers with pre-made design templates for dashboard applications, landing pages, kanban boards, chat applications, and other scenarios. The package allows developers to create modern React applications with Tailwind CSS through its Flowbite React components that use TypeScript. **Flowbite Pro** offers a complete set of features, including icons and illustrations, AI-generated web sections, and HUGO templates for enhanced development speed. Webpack bundle optimizer and workflow simplification features are included in its package.

AI-powered capabilities in Flowbite GPT help users automatically create new website elements and pages, simplifying the process of designing and styling interfaces. **Flowbite Pro** gives you all the components to efficiently design high-quality visual interfaces for admin dashboards, e-commerce platforms, and personal sites.

Key Features of **Flowbite Pro** :

1. **600+ Tailwind CSS Components –** A rich library of UI components for applications, marketing, and e-commerce websites.
2. **450+ Website Sections –** Pre-built layouts for hero sections, tables, side navigation, and feature sections.
3. **Figma Design Files –** Ensures consistency between design and development so you can preview and edit before coding.
4. **React Components with TypeScript –** Pre-built React UI elements using Flowbite React, fully compatible with Tailwind CSS.
5. **Application UI Templates –** Get access to dashboards, kanban boards, calendars, AI-powered prompts, and chat rooms to accelerate development.
6. **Marketing UI Templates –** Includes beautifully designed landing pages, about pages, contact pages, and more for businesses.
7. **AI-Powered Website Generation –** Use Flowbite GPT to instantly create website sections and pages.
