is a specialized software designed for fast and precise processing of ID photos, such as those needed for passports and visas, ensuring they meet international and local regulations. With a database of over 280 ID formats for 87 countries, this tool makes ID photo creation quick and easy. Unlike general photo editing software, **ID Photos Pro** focuses on biometric requirements, automatically adjusting and verifying photos in 10 seconds, ensuring they meet the necessary standards.

The software uses advanced facial recognition algorithms to detect important features and automatically crop the image according to country-specific requirements. It also checks for common issues, like incorrect facial expressions or the presence of glasses, and guides users through a simple, four-step process to create the perfect photo. This user-friendly interface makes it easy to produce compliant ID photos, even for countries with specific or unique requirements.

**ID Photos Pro** offers many convenient features, including printer compatibility, automatic photo archiving, and job tracking. It is fully GDPR compliant, with built-in privacy tools and secure cloud storage for delivering photos safely. Additionally, the software is approved for specialized formats like France's ePhoto program and the UK's ePassport application process.
