**Design Your Own Products:** It's never been simpler to design your designs and patterns and create products you can sell on the internet. This course will concentrate on the creation of three distinct designs. We will learn how to use Adobe Illustrator to create patterns quickly; then, we will test the patterns on our products.

Then, we will create a highly colorful geometric design and come up with various variations. Then, we'll make a unique vector illustration with lighting and shadows to make it stand out and then place it on a fantastic space background.
