# Using ASP.NET Core Web API and NoSQL Databases - Edward Curren

2025-03-27 20:43:21

Discover how to harness the power of RESTful Web APIs with ASP.NET Core and NoSQL databases in this comprehensive course "". By delving into the intricacies of ASP.NET Core Web API and MongoDB, you'll master the art of crafting efficient and scalable solutions for modern browser applications. Throughout the course, you'll delve into the fundamentals of storing and retrieving data from NoSQL databases, while gaining hands-on experience in implementing REST APIs using C# and ASP.NET.

Furthermore, you'll uncover the seamless integration of web pages with your API, ensuring a cohesive and dynamic user experience. By the **Using ASP.NET Core Web API and NoSQL Databases - Edward Curren**'s conclusion, you'll possess the expertise to adeptly design and deploy REST APIs using ASP.NET in conjunction with NoSQL databases, equipping you with indispensable skills for today's development landscape.

## Using ASP.NET Core Web API and NoSQL Databases Table of contents:

1. Course Overview (Duration: 1min)
2. Understanding the Basics of APIs (Duration: 34mins)
3. The Data and Database Setup (Duration: 21mins)
4. Writing the APIs (Duration: 45mins)
5. Putting a Front End on It (Duration: 14mins)
